

# Test Card Numbers

The following card numbers can be used for testing regular card transactions in the BlueSnap Sandbox environment. The table indicates what the expected result is for each test card, such as a successful charge or a specific error. To test AVS and CVV response codes, click [here](#).

## Notes:

- To test other payment methods such as [Apple Pay](#) or [Visa Checkout](#), follow the instructions on the relevant payment method page.
- [Google Pay](#)™ does not support test cards; however, you can use a “live” card in Google’s test environment. Google will return a token value with the transaction response, but they will not charge your card when it’s used within their test environment. Refer to [this site](#) for more details.

## Amex

Enter a random 4-digit CVV.

Card Number	Exp. Date	Result
374245455400126	05/2026	Success
378282246310005	05/2026	GENERAL_PAYMENT_PROCESSING_ERROR

## Mastercard

Enter a random 3-digit CVV.

Card Number	Exp. Date	Result
5425233430109903	04/2026	Success
5425233430109903	12/2026	Invalid exp. date
2222420000001113	08/2026	Success
2223000048410010	09/2026	Success

## Visa

# Visa Credit
